The OneGuard Service

Provision of **industry-specific** employee training in AI threat detection

Mitigation of **risk** from AI fraud attempts within a company

Customisation of programmes to suit ranging requirements

Partnership with **experts** to offer the highest-quality training and mitigation strategies

Brand Research

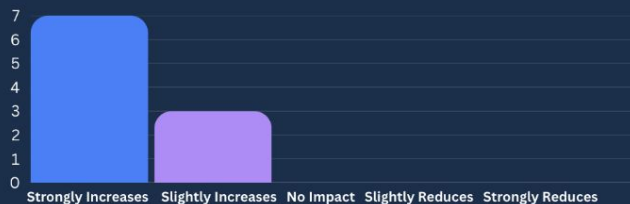

Surveyed Google · Lloyd's Banking Group · American Express · Barclays · Deloitte · iMMERSIVE · Jane Street · Navig8 · UBS

- Survey covered 10 targeted decision-makers, spanning 4 relevant industries

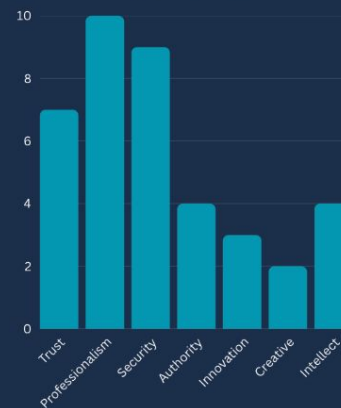

- Every decision validated by industry professionals

- Survey findings directly shaped market and launch materials

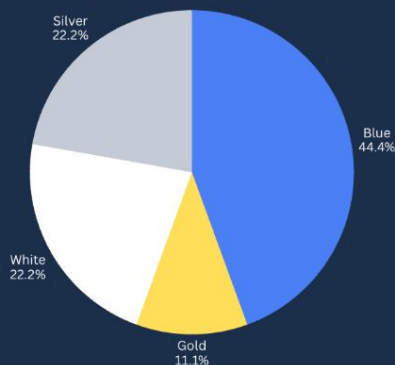

How would a Colour Scheme affect Perceived Credibility?

What does the Logo Communicate?

What Colours are associated with an AI Cybersecurity Firm?

Expected Tonal Language

Market and Launch Activity Material

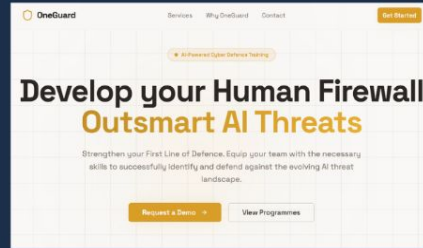

Initial Version

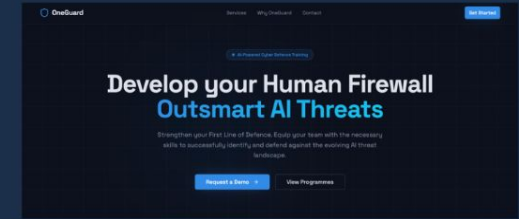

Designs: Survey Responses & External Validation

Final Version

Colour Schemes, Tonal Language: Professional Feedback

Data Representation: Legal & Ethical Considerations

Industry Engagement & What We Learned

Chief Information Security Officer, Elecon Engineering

“How are emerging tools with strong potential but limited external validation and low recognition evaluated for effectiveness, reliability, and practical impact?”

Chief Executive Officer & Founder, Adaptive Security

Adaptive Security is a competitor in AI training defence (operative outside of our sector niche)

- Key factors to gain early traction and grow a reputation
- Correct client approach methods
- Establishment of trust and credibility
- Advice and mistakes

Engagement in SecurityWeek’s conference resulted in unprompted interest from Cohesity, an AI-powered data security firm.

Partnership Pitch

The Deloitte logo, consisting of the word "Deloitte." in white sans-serif font on a black rectangular background.

- “That [customisable] flexibility is likely to lead to a greater optic... you can price that flexibility quite highly... shows your understanding it from the buyer’s perspective.”
 - “Tech is industry agnostic now... thus meaning that the potential ROI here is off the charts.”
 - “Overall, I think it’s definitely good and you lay the foundation for a good partnership.”
-
- “Three levels: a Standard, a Silver, and a Gold... the idea is the gold is expensive so people buy the silver and they buy the silver rather than the standard.”
-
- “Why are you better than any in-house team that Deloitte or Google will have?”
 - “Needs to be marketed as a market-ready product that WILL provide ROI, not MIGHT.”

Ethical and Legal Considerations

AI is a new, emerging technology and there exists **several ethical, legal, and sustainability** concerns.

Legal & Compliance: Copyrighted material, Multinational laws

Ethics & Transparency: Ethical considerations, AI content ethics

Quality & Data Handling: Accuracy and sufficiency, Data processing

Business & Reputation: AI adoption marketing, Partner reputation

Accessibility & Sustainability: Accessibility, Environmental impact

Forward Strategy

We have identified the following **core** risks and uncertainties moving forward:

Organisational Backing · **Data privacy** · **Rapidly Evolving AI** · **Alignment with Organisational Goals**

The identified **risks** and our **semester learnings** have produced the following steps to **drive our future strategy** with OneGuard across these 3 areas:
